ENTRY GARDEN

Scale: 1/4" = 1'-0"
**Entry Raingarden**

A - Dwarf Mountain Laurel (Kalmia latifolia 'Elf' or 'Tiddlywinks')
or Sweetspire (Itea virginica 'Little Henry')
Spacing: 3 feet center to center

B - Wild Ginger (Asarum canadense) or Foamflower (Tiarella cordifolia)
Spacing: 12 inches center to center

C - Christmas Fern (Polystichum acrostichoides)

D - Heuchera (Heuchera Americana)
or Narrowleaf Sedge (Carex amphibola)
Spacing: 2 feet center to center

E - Pennsylvania Sedge (Carex pensylvanica)
or Green and Gold (chrysothemum virginianum)
Spacing: 12 inches center to center

**NOTE:** All listed plants are Virginia Coastal Plain natives.

**Planting Notes:**
- Dig planting holes 2 times wider than plant rootball and deep enough only to cover top of root ball. Backfill soil should not contact trunk of plant.
- Amend planting bed to 6 inch depth or backfill holes using topsoil mixed with compost. Heavy clay and compacted soil requires more compost.
- Thoroughly water-in each plant while backfilling and after planted. Water new plantings every other day for first three weeks to get them established.
